

FIUME: OBJECT OF RIVAL CLAIMS

The exploits of Gabriele d'Annunzio at Fiume, recalling the adventures of a medieval knight, keep that ancient city in the public eye.

If Trieste was the Bremen of Austria, Fiume was the Hamburg of the Hungarian kingdom, a close rival for the brisk Adriatic trade of the period before the war.

Fiume is another of those footholds on the eastern Adriatic where Italians cling fast despite the steady influx of Slavs in the interior, and, in this case even into Fiume itself. Thus the city bears evidence of early Italian culture, it figured as a potent Slav factor in the turmoil of Balkan politics, and it felt strongly the influence of Hungary upon its thriving industries and fast growing commerce.

Magyar gerrymandering caused it to be annexed to Hungary in 1870, despite the protest of Croatia to which it had belonged since the revolution of 1848-49. Tender consideration for its value as a seaport, rather than for its citizens, prompted its establishment as a royal free town, making it a geographical slice of about seven square miles cut out of Croatia.

Despite the Hungarian interest in the city its pre-war population was 90 per cent Italian and Slav, with the Italians slightly predominant. Only about half the remaining tenth were Hungarians. The Slavs included Croats, Serbs and Slovenes. As important to Hungary as are New York or Boston to the United States, Fiume's total population is not much greater than such suburbs of those American ports as East Orange, N. J., or Newton, Mass.

Fiume is situated on the northeast shores of the Gulf of Quarnero, only seventy miles, by rail, southeast of its trade rival, Trieste. Across the bay is the popular summer resort, Abbiadzia, famed for its evergreen laurel and profusion of roses, to which tens of thousands of visitors formerly thronged each summer.

The older town, distinctively Italian, is built on the hillside, overlooking the gulf. The newer city lies nearer the waterfront. There are three harbors. The largest, accommodating 150 large vessels, is protected by a breakwater half a mile long. The quay is nearly two miles long.

Before the war Fiume's manufacturing plants included a government tobacco factory, the Whitehead torpedo works, a rice shelling factory, a petroleum refinery, and many smaller plants, among which were saw mills and paper mills. Its fisheries constituted an important industry. It exported sugar, grain, flour, horses and timber.

"GO WEST," SAID GREELEY; "SPREAD OUT," SAYS ELIOT.

How are the evils that go with city crowding to be avoided in the face of the increasing congestion of American cities?

By making the cities more like the country, is the gist of one noted thinker's solution of that question. Despite the steady procession of country folk to cities, their new environment lacks many of the benefits of the places they came from, in his opinion.

Charles W. Eliot, world-famous educator, in a communication to the National Geographic society says:

"In order to cure the destructive evils of present urban life and the factory system, it will not be enough to restrict the vices, to diminish the pressure of poverty, to prevent destructive diseases, and prolong the average human life. The human environment must be not only negatively but positively improved; so that the whole people may have the opportunity to cultivate healthy tastes and interests, to acquire just ideals of pleasantness and beauty, and to learn the value toward tranquil happiness of that living with nature which city congestion has within a single generation made almost impossible for multitudes.

"The present evils of city life and the factory system—bad conditions which civilization has itself created—have developed their destructive forces in this country in spite of the schools and churches and of free political institutions, and in spite of many happy influences from art, poetry, music and the drama. Clearly, society needs to develop a new and better environment favorable to both bodily and mental health and to the attainment of genuine happiness—not of mere momentary excitement, pleasures and gratifications, but of solid contentment, and the lasting satisfaction of life enjoyed in quietness and peace. What are the means of compassing this end?

"The readiest means is good planning of city, town and landscape—first applied to areas still open, and then gradually to areas already occupied in undesirable ways. The new planning must take into account the interests of the whole community, as well as the interests of individual owners, the social or collective interest always prevailing.

"The immediate objects to be sought are more light and air for dwellings, offices, shops and factories, and thus a spreading out of cities; the transfer of factories to suburbs and to country sites along the lines of railway; the multiplication of playgrounds and open deserted areas, and above all the attachment of a piece of arable or garden ground to every family dwelling.

"The collective force of the community must further supply the means of making rural and landscape pleasures occasionally accessible to city populations by means of parks and gardens which illustrate all forms of open-country beauty and permit the occasional enjoyment by city families or larger urban groups of the outdoor pleasures which woods, shrubberies, gardens and broad fields can give."

POLAND ONCE THE SAVIOR OF EUROPE

Poland, whose history is tragedy and whose people have been called "Children of the Sun," plays no new role when she seeks to stop the onslaughts of the bolshevik, for it was she who once stayed the march of the Turk across Europe.

A communication to the National Geographic society sums up Poland's sad and eventful history as follows:

In size she outranked nearly every nation of the continent. Russia alone of the European nations is larger than Poland was at her greatest. In population she stood at the forefront of Europe. Only Russia and Germany had greater populations before the war than are to be found in the lands that once were Poland; for unpartitioned Poland had an area of 282,000 square miles, and the lands that once lay within her boundaries support a population of approximately 50 million. In area she was as large as the former German empire, Switzerland, Belgium, Holland and Denmark together; larger than Great Britain, Italy and Greece combined; larger than Austria-Hungary and Serbia in one. Within what were her boundaries there dwelt a present population of Great Britain and Belgium; larger than those of France, Belgium and Holland together; and matching that of the old Austria-Hungary.

Poland was three times partitioned, and these partitionings were readjusted between the partitioners by the Congress of Vienna in 1815. Where the original partitions had given Russia 121,000 square miles, Prussia 54,000 square miles, and Austria 45,000 square miles, the reapportionment of the Vienna Congress gave Russia 220,000, Prussia 26,000, and Austria 35,000 square miles. Much of the land which Russia secured, and particularly Kiev, had been identified with Russia generations before.

Poland, in the days of her greatest area, extended from a point within 50 miles of Berlin, on the west, to the meridian of the sea of Azov on the east; on the north it reached nearly to the Gulf of Finland and on the south down to the Khanate of Crimea.

What we now know as Russian Poland is that neck of territory stretching westward between the Prussias and Galicia. This territory has an area almost exactly equal to that of New York, yet, in spite of the fact that its extreme southern boundary lies north of the latitude of Winnipeg, its population is as great as those of New York and New Jersey combined.

PEKING: A CITY WITHIN A CITY

Until recently Peking, capital of China, with its 700,000 people, was one of the least known of the great cities of the world. It took the Boxer rebellion and the siege of the legations in 1900 to open the long-closed doors. Recently it has been in the headlines because of revolutionary disturbances.

Peking is a "city within a city." The Chinese city, built in 1543, is the commercial center. The Tatar city dates from 1267 and includes the famous "Forbidden City," of which the Dragon Throne of the Son of Heaven, Emperor of the Middle Kingdom, is the center. The throne is of rare wood exquisitely carved. Just back of it is a screen of golden lacquer so dainty in design and execution that it gives the appearance of golden lace. Around this throne room are arranged the palaces, shut in by purple walls.

The Chien-men street bisects the Chinese city from the South Gate, where the railway enters, to the principal gate in the wall separating the Chinese from the Tatar city. Along this main thoroughfare there passes a continuous throng. There, too, may be seen the springless passenger cart, with its blue arched roof and yellow wheels, corrugated metal tires, and its awning sheltering driver and mule, or the Mongolian camel, the ship of the Asian desert; and, interesting above all, the scarlet bridal chair with its place of haecum and parcel of sugar hung on the back as an offering to the demons who might molest the bride while on her journey. Officials hurry back and forth in the gorgeous chairs, their coolies making great din as they seek right of way. Noisy vendors of amulets, and medicines of ground tiger bones to strengthen faint hearts, and extracts of rat meat to make the hair grow, add to the din.

On the east side of this roadway is an enclosure of about one square mile which contains the Altar of Heaven, surrounded by shrines and temples, the most important of which is the circular, three-roofed marble Temple of Heaven with pillars of Oregon pine and roof of deep blue porcelain tiles.

Near the ornate Temple of Heaven is the Temple of Confucius, "the most holy ancestral teacher."

The Washington monument of

Peking is the famous thirteen-storied Buddhist pagoda from the summit of which a fine view of the city may be had.

Peking claims the oldest daily newspaper in the world, the Peking Gazette, compared with whose age the London Times, with its hundred years, is in its infancy. For six dollars a year a Pekingese can read all that his government desires him to know as to its actions, or he can rent his Gazette for the day and return it. In former years newspapers were found on the walls in the form of posters. They were printed from a large block of wood upon which the intricate characters had been cut by hand.

In the heart of the Tatar city is another enclosure—the "Forbidden City," in which stands the Imperial palace, distinctive in China because it is faced with yellow porcelain. Surrounding the palace are the gardens, reception halls, pavilions and offices formerly used by the emperor in conducting the affairs of the empire.

"Prospect Hill" would be interesting to those who went to the "movies" to keep warm during the recent coal shortages. The hill is a huge mound of coal which was to provide fuel in time of siege, and it is now covered with a grove of beautiful trees.

The Pekingese are consumers only. The trade of the city is small, although it is open to foreign commerce. The famous Grand canal which connected it with the rich provinces of South China greatly facilitates the transportation of rice and other products.

PRESERVING A "WHITE AUSTRALIA"

Declaration by the prime minister of Australia that his country was determined to maintain its traditional policy of a "White Australia," a policy as firmly grounded there as is the Monroe doctrine in the United States, again turned the attention of the world toward that remote and unique continent.

"It is not that Australia despises immigration," explains a communication to the National Geographic society from Herbert E. Gregory. "It is rather that she has clung to her ideal of a homogeneous people of British origin."

"Australia is disappointed that of the four large areas which offer congenial homes for people of European blood—namely, Australia, Canada, United States and Argentina—Australia alone is passed by, while the other three favored regions have received Europeans by hundreds of thousands. She saw the United States receiving in one year (1913) 1,197,892 people from abroad, more than the

Mt. Victoria Pass, New South Wales.

entire net immigration to Australia for the preceding fifty-three years, and in another year (1910) enrolling four times as many people born in the United States Kingdom as were living in Australia.

"The traveler in search of duplicates of the Canadian Rockies, the Yosemite, the Grand Canyon, of Norwegian fjords and Alpine scenery, need not visit Australia. Its mountain scenery is that of the southern Appalachians, the White mountains and the low ranges of Arizona. Its plains and plateaus are comparable with those of the Rocky mountain foothills and the arid expanses of Utah, Idaho and Oregon. The blunt granite cap of Mt. Kosciuszko, 7,328 feet above sea, is the culminating point of land. A half dozen peaks reach the height of Mt. Washington, and something like one per cent of the entire land area rises as high as the Catskills.

"That the size and form of a hand-mass nearly as large as Europe should have remained unknown until 1770 is most remarkable.

"Curiously enough, the establishment of the first colony of the new-found continent is an episode in the history of the United States. It was proposed by the British government to utilize the land as a home for the 'Loyalists' (Tories) who found life in the American colonies uncomfortable at the close of the Revolutionary war. They were to be supplied with land and money, and Malay slaves or English convicts were to be provided as laborers.

"Fear of the French fleet and the removal of many Tories to Canada led to the abandonment of this scheme, but another use for Botany Bay was soon discovered. Place must be found for undesirable citizens, who, before the Revolution, had been sent to America at the rate of one thousand a year, and New South Wales met the requirements. The history of Australia begins with the year 1788, when ten hundred and thirty-five convicts under military escort landed at Sydney Cove."

Scenes in Wall Street After Bomb Outrage

These photographs were made only a few minutes after the terrible explosion in the Wall street region in New York, which resulted in about 35 deaths, the injury of several hundred persons and great damage to property. The authorities are convinced the blast was from a huge bomb in a one-horse truck that was standing near the sub-treasury. There is good reason to believe it was left there by anarchists who belong to the group that was responsible for the bomb outrages of 1919, and that this new atrocity was intended by them as a defiance of the government of the United States. The pictures show, at the right, the shattered front of one of the buildings that received the brunt of the explosion, and below, the police and volunteer rescuers removing bodies of the victims. Immediately after the blast strong guards were thrown around the sub-treasury and the banks in the region.

Women Learn How to Cast Their Ballots

At Republican state headquarters in New York city a school for women voters was opened and the fair pupils went through all the motions of casting their ballots just as they will in the polling places.

Aerial Acrobat Meets Death

Leon Ferguson, a daring aerial acrobat, was killed while performing on the wing of a plane less than 100 feet above the ground, at the Sonoma fair, Santa Rosa, Cal. Pilot Schmidt, who accompanied him on the flight, received only a scratch on his head. This photograph shows the wrecked plane and Pilot Schmidt being lifted from machine.

Jackies "Sleeping on the Green"

The Jackies are sleeping on the green, but the "green" in this case is not the lawn or meadows, but the green of a pool table—for the Navy club in New York is crowded with visiting Jackies.

READS LIKE A ROMANCE

Rev. David S. K. Byrne of Montreal, who will soon enter into possession of the \$10,000,000 estate of the late W. G. Byrne, Mr. Byrne in 1907 was David S. Kidd, a tea salesman of Toronto, in Chicago on business. It was his custom to carry a Bible with him. In a saloon in the slums he was attracted by the beauty and intelligence of a twenty-year-old girl, the daughter of a wealthy miner. He spoke to her, urging her to go to her family. The girl was so affected she promised to return to her home. Several weeks later Kidd received a letter from the girl's father, W. G. Byrne, then of Baltimore, saying he would support Kidd in helping other women to go right, and requesting him to change his name to Byrne. This Kidd did and as further evidence of his gratitude, the father left him \$425,000 in his will and directed that he be sole trustee for a \$1,000,000 church and tabernacle. Kidd thereafter became a clergyman to carry out the wishes of his benefactor. Lucy Byrne, the rescued girl, died one year after her return home. Her mother and brother were drowned when the Empress of Ireland was lost to the St. Lawrence in 1914. Rev. David Byrne thus became sole heir to the extensive Byrne mining and oil properties in Pennsylvania, Florida, Mexico, Argentina, Brazil, Spain and Australia, valued at \$10,000,000.

Advantage of Learning

Suspicious Mother—Marlar, was that young student a-kissin' of you on the porch last night?
Vassar Daughter—How could you suggest such a thing, ma? He was merely showing me the proper use of labials in practical osculatory exercises.
